

How to Use MH-CURE Custom Caller ID *BYOD iOS-Only*

Custom Caller ID allows users to customize the number that displays on your Caller ID

1 Press Phone option

2 Press Custom Caller icon

3 When pressing icon the app will ask user to confirm their cell phone number. Press Next after entering.

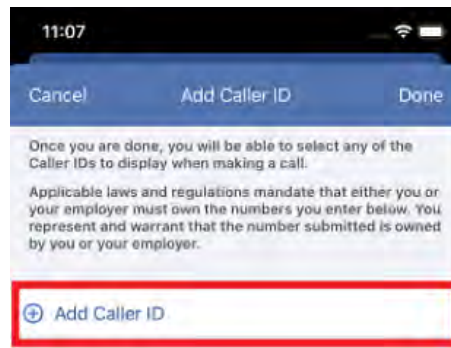

If you do not see this step, the alternate caller ID option has not been enabled in the user profile!

4 Confirm your number

5 Press Add Caller ID to add numbers and press Done when finished. Ex: Office or Outpatient Office

6 Before making a call, change your Custom Caller ID by pressing the Custom Caller icon and selecting the alternate number

7

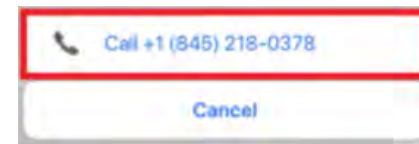

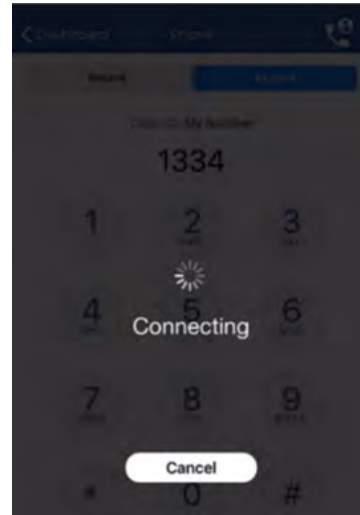

Before making a call, confirm the Caller ID that you'd like to use is displayed at the top of the dialpad

8

Dial the number you are trying to reach and press Call OR choose a contact in the contact directory.

A connecting screen will briefly display before a pop-up appears showing the number (845) 218-0378. This is a 3rd party connecting number that allows for the custom ID to work. Press Call.

Note:

If your Custom Caller number is entered incorrectly, you will receive an error message that your call could not completed.
