

iMobile – Assigning to a Dynamic Role

1

Dynamic Roles (DR) help identify users and get messages or notifications to them quickly. It is important for users to log into any role that they might be in or performing during their shift for smooth communication. Users may assign themselves to multiple DRs. However, only one user can be assigned to each DR at a time.

1. To Assign to a DR, open the *Dashboard* on the iMobile device.
2. Select *Dynamic Roles* section.
3. Select the type of DR desired, such as Security, EVS or Team Lead.
4. Choose the DR you want to take and then *Confirm* that you are assigning to or assigning to replace as the DR.

5. To un-assign from a DR, open to the *Dashboard*, select *Dynamic Roles*, select the role(s) to un-assign, & *Confirm* then log out.
6. The last 3 recent DR's that the user has assigned themselves will dock at the top of the page for easy access.
