

# iMobile – Contact List Overview

To open the contact list, select the icon for Contacts.

The iMobile directory belongs to each facility and contacts may be modified as needed. Please contact the Clinical Informatics Manager for changes.

There are multiple ways to find users and numbers:

1. My Units – browse iMobile users by the units that you have assigned yourself. This list pulls users that are also assigned to those units and sorts by position.
2. Any Unit – pulls by position, all iMobile users in any unit.
3. Hospital – pulls both iMobile users who are affiliated to the hospital and the hospital specific directory. Users with multiple affiliations will need to choose the desired location to open list.
4. Specialty – look for an iMobile provider by the specialty that they practice.
5. Favorites – pulls a list of the users identified favorites.
6. Dynamic Role Hospital – pulls a list of iMobile Dynamic Roles for the chosen hospital & indicates if the DR is assigned or unassigned and if assigned that the user is active (green circle).
7. Dynamic Roles Favorites – pulls a list of user added Dynamic Role favorites.
