

iMobile – Making & Searching Favorites

Using the Favorites functionality in iMobile will save time. A favorite can be made either from the Contact or the Dynamic Role. Once a user/number is added it will pull to the Favorites section for the Contact List.

1. Search via Contacts to find user/number, then slide the button for *Add to Favorites*. The name will change to *Remove from Favorites*.

2. Search through the *Browse Dynamic Role by Hospital* to find the DR desired, then slide the button for *Add to Favorites*. The name will change to *Remove from Favorites*.

3. Favorites pull alphabetically into the Contact List as either a Contact Favorite or a Dynamic Role Favorite.

To add a **user/number** as a Favorite:

1. Search via Contacts to find user/number, then slide the button for *Add to Favorites*. The name will change to *Remove from Favorites*.

To add a **Dynamic Role** as a Favorite:

2. Search through the *Browse Dynamic Role by Hospital* to find the DR desired, then slide the button for *Add to Favorites*. The name will change to *Remove from Favorites*.
