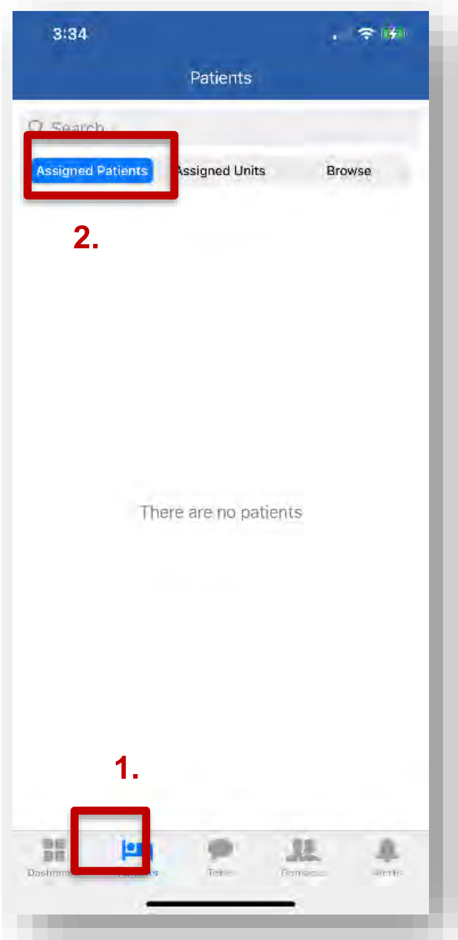
iMobile – Patient List



The Patients Icon in iMobile will open to a Patient list, which contains confidential information. Do not open information that you should not.

1. Select the Patients Icon, then select to view either the Assigned Patients or the Assigned Units page.

2. Assigned Patients are those that you have been assigned in R5 or those that you have self assigned in iMobile.

3. The Assigned Units pulls the patients over from the Units that you have Assigned to from the Dashboard.

4. Patient Information will display including Room number, Name, Sex and DOB. Remember Patient confidentiality and only open patients that you are providing care.

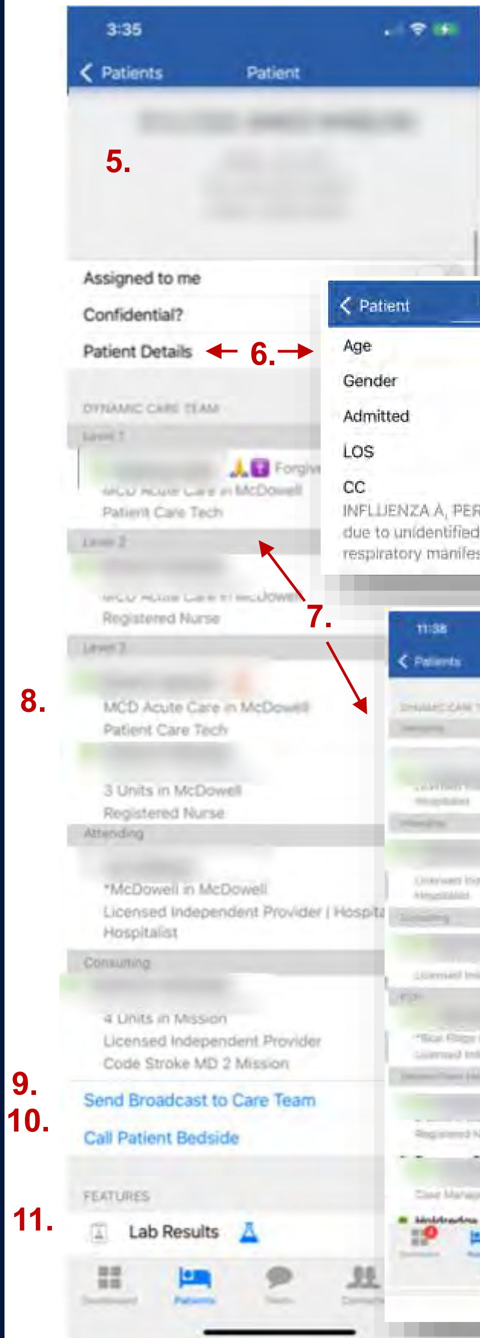
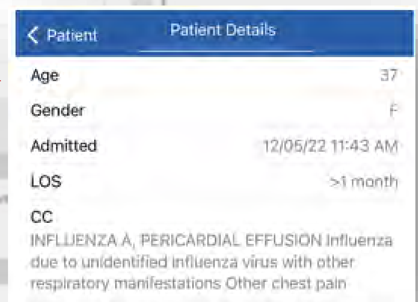
iMobile – Single Patient View





5. After you select a patient, the patient view opens. At the top is patient information including name, location, MRN, FIN and DOB.
6. Patient Details opens the patient's age, gender, admission date, LOS, and Chief Complaint.
7. Care Team is listed by R5 assignment and or the Cerner relationship. Level 1, 2, and 3 is determined by R5. The Care team is also listed by the provider role and General Team Members.
8. Calls/Texts maybe sent to the Care Team individually by selecting the care team member.
9. A message may also be sent as a broadcast to the group of Assigned Caregivers. Either individual or group caregiver messaging will include the patient and room number in the message.
10. Call the Patient Bedside will send the call directly to the patient.
11. Features include recent lab results, camera and CulturaLink for quick access.
